

Assignment_3

Q1) Write an SQL query to insert the above employee records into the EMPLOYEES table.

-- insert into employees values

```
-> (101,'Neena','kochar',2,,17000,200,10),  
-> (102,'Lex','de haan',2,17000,200,10),  
-> (103,'Alexander','hunold',3,9000,103,60),  
-> (104,'bruce','ernst',6000,103,60),  
-> (105,'david','austin',3,4800,103,60),  
-> (106,'vallie','potaballa',3,4800,103,60),  
-> (107,'diana','lorentz',3,4200,114,30),  
-> (108,'nancy','greenberg',4,12000,145,80),  
-> (109,'daniel','faviest',4,9000,145,80);
```

Q2) Write a single SQL INSERT statement to insert at least 3 department records into the DEPARTMENTS table.

-- insert into departments values

```
-> (10,'Administration', 200, 1700),  
-> (20,'Marketing',201,1800),  
-> (30,'Purchasing',114,1700),  
-> (60,'IT',103,1400),  
-> (80,'Sales',145,2500);
```

Q3) Write an SQL query to insert one new job record into the JOBS table ensuring duplicate JOB_ID is not allowed.

-- insert into jobs

```
-> (job_title,min_sal,max_sal)  
-> values  
-> ('Developer',56000,70000);
```

Q4) Write an SQL query to increment the salary of each employee by 10%.

```
-- update employees  
-> set salary=salary + (salary * 0.1);
```

Q5) Write an SQL query to set EMAIL = 'not available' for employees whose department_id is 80 and commission_pct is less than 0.20.

```
-- update employees  
-> set email='not available'  
-> where department_id = 80;
```

Q6) Write an SQL query to set EMAIL = 'not available' for employees who belong to the 'Purchasing' department.

Q7) Write an SQL query to update EMAIL = 'not available' and COMMISSION_PCT = 0.10 for all employees.

```
-- update employees  
-> set email='not available';
```

Q8) Write an SQL query to increase salary by 2000 for employees working in department_id = 60.

```
-- update employees  
-> set salary = salary + 2000  
-> where dept_id = 60;
```

Q9) Write an SQL query to delete employees whose salary is less than 5000.

```
-- delete from employees  
-> where salary < 5000;
```

Q10) Write an SQL query to insert one new employee record with your own suitable details (use a new employee_id).

```
-- insert into employees values  
-> (115,'maven','jordan',1,56000,201,30,'not available');
```

Q11) Write an SQL query to change manager_id to 300 for all employees in department_id = 80.

-- update employees

-> set manager_id=300

-> where dept_id in(

-> select dept_id from departments where dept_id=80);

ERROR 1452 (23000): Cannot add or update a child row: a foreign key constraint fails
(`fbs`.`employees`, CONSTRAINT `employees\_ibfk\_3` FOREIGN KEY (`manager\_id`) REFERENCES `departments` (`manager\_id`))

Q12) Write an SQL query to delete the department record where department_id = 20 and observe

the error if employees exist in that department.

-- ERROR 1451 (23000): Cannot delete or update a parent row: a foreign key constraint fails
(`fbs`.`employees`, CONSTRAINT `employees\_ibfk\_3` FOREIGN KEY (`manager\_id`) REFERENCES `departments` (`manager\_id`))
